

Compute Your Grade Point Average (GPA) for CSU Eligibility*

Use semester grades in all 10th, 11th, 12th (if filed after CSU priority filing period) grade UC/CSU approved courses. Summer school courses count, including the summer between 9th and 10th grade. For repeat courses, use the highest grade only.

UC/CSU approved honors/AP courses (see UC-approved Course List handout: [http://paly.net/college/UC Approved courses.pdf](http://paly.net/college/UC%20Approved%20courses.pdf)) taken in the 10th, 11th and 12th grades (maximum of 8 semester courses total, with no more than 2 courses taken in 10th grade) receive one additional grade point for each A, B, or C grade.

Step 1: Fill in the number of semester courses you have taken, next to the grade you earned.

Step 2: Multiply the number of courses by the grade points per grade to get the total grade points.

Step 3: Fill in the number of UC/CSU approved honors and AP courses (maximum as above) in which you received a C or better.

Grade	Number of Semester Courses	Grade Points per Grade	Total Grade Points
A		x 4	
B		x 3	
C		x 2	
D		x 1	
F		x 0	
Honors/AP		x 1	
TOTAL		TOTAL	

Step 4: GPA equals the total of Column 4 including honors line, divided by total of Column 2, *not including honors line*.

Your GPA = _____

* This calculation will approximate your GPA as of now; you will need to re-calculate it before completing your UC/CSU college application. Be aware that many campuses will re-calculate your GPA as part of the application review process.

** Cal Poly, San Luis Obispo uses a 9-12 UC/CSU GPA for selection
